

Assessing the Strengths and Needs of Ohio's Suicide Prevention Coalitions

Coalition Assessment Tool

One of the goals of the Ohio Suicide Prevention Coalition Partners meetings is to increase the ability of local suicide prevention coalitions to conduct effective work that will have a meaningful impact on reducing suicides in your communities. An important step in this process is assessing the capacity of your coalition according to coalition best practices. Your responses will be used to develop virtual trainings that will be open to all of Ohio's suicide prevention coalitions to provide ongoing learning opportunities that will help strengthen your coalition's efforts. It will also be used to inform statewide planning for suicide prevention in Ohio.

This tool is best completed by a team of coalition members. As a coalition leader, please select approximately 3-5 individuals who are knowledgeable about your coalition to complete the tool. Print out a paper version of this tool and use it to conduct a meeting with your coalition members by coming to consensus on your responses. After that group process is completed, please enter your responses into the on-line version of the assessment tool. Each coalition will receive a separate email that includes an individualized submission link for their coalition. Please have this completed and entered into the survey portal **no later than August 30, 2021**.

Your responses will be kept completely confidential and the data will be used to provide an aggregate picture of all of Ohio's suicide prevention coalitions. However, **if you are interested in sharing your assessment data, this tool may be scanned and emailed to Andrea Hoff with You Thrive Training & Consulting, LLC, at ahoff@youthriveconsulting.com**. Andrea will use these responses to create an Individualized Coaching Development Plan for your coalition that will illuminate the most important coalition components that should be addressed in order to strengthen your coalition's suicide prevention efforts. These plans will be provided to coalitions during one-on-one technical assistance meetings on a first-come, first served basis, for those coalitions that are interested in participating in this free service.
